Subject Index of Volume 49

Acetate
  shape selective alkane functionalization by ethyl diazoacetate catalyzed by Rh carboxylates, L13
Acetophenone
  improved Rh–DIOP catalyst system for homogeneous asymmetric hydrogenation of, 165
Activation
  oxygen; stereochemical control of, in synthetic oxygen carriers, 9
Addition(s)
  enantioselective Michael, catalyzed by Co(II)/1,2-diphenylethylenediamine; asymmetric catalysis, 133
  influence of, of metal chlorides; hydrogenation of cinnamaldehyde over Pt catalysts, 223
Adipic acid
  Co/Zr-catalyzed oxidation of cyclohexane to, L39
Adsorbate interaction
  enhancement of ethylene metathesis rate by, between ethylene and CO, L43
Alcohols
  1,3-aminoalcohols: new method for preparation of; hydrogenolysis of β-lactams on Raney Ni; transformation of compounds containing C—N bonds on heterogeneous catalysis, 103
  benzyl alcohol; oxidation of, with Cu(II) mediated by polymeric oxoaminium salt, L31
  cyclohexanol, photocatalytic liquid-phase dehydrogenation of, with Rh porphyrin complex, 113
  ethanol; low temperature homologation of, catalyzed by Ru–EDTA–CO complex, L69
  ethylene glycol formation from CO and H_2 by homogeneous Re catalysts, 315
  liquid phase synthesis of, from syngas over electrogenerated Cu–metal catalyst, L35
  methanol; kinetics of epoxidation of cyclohexene by molecular oxygen catalyzed by dichlorotetraaquoruthenium(III) in presence of reductants L-ascorbic acid and methanol, 299
  selective hydrogen transfer reactions from, to ketones promoted by Rh complexes with 1,10-phenanthroline and related ligands, 175
Alkanes
  cyclohexane; Co/Zr-catalyzed oxidation of, to adipic acid, L39
  nitroalkanes and nitriles; orthometalated Pd(II) complex-catalyzed reduction of, 271
  shape selective alkane functionalization by ethyl diazoacetate catalyzed by Rh carboxylates, L13
Alkenes, Olefins
  butene; liquid phase catalytic oxidation of, to methyl ethyl ketone; kinetic study, 143
  cyclohexene:
    catalyzed by Rh(I) complexes of bidentate (NP) ligand, (2-(diphenylphosphino)ethyl)benzylamine; thermodynamics of homogeneous hydrogenation of, 33
    catalyzed by Rh(I) and Ir(I) complexes of polydentate phosphine ligands; thermodynamics of homogeneous hydrogenation of, 43
    kinetics of epoxidation of, by molecular oxygen catalyzed by dichlorotetraaquoruthenium(III) in presence of reductants L-ascorbic acid and methanol, 299
  cyclopentadiene; formation of cyclopentadienyl anions at surface of MgO by interaction with, and their reaction with H_2 to give surface hydrides, 187
  ethylene metathesis rate by adsorbate interaction between ethylene and CO; enhancement of, L43
  functionalization of; catalytic amination of monoolefins, 235
  methyl-1-alkenes over $CsNO_3$—Re_2—Al_2O_3 catalyst; metathesis of, 261

© Elsevier Sequoia/Printed in The Netherlands

2-methyl 2-butene; kinetics and equilibria of methoxylation of; synthesis of ter-amylic methyl ether (TAME) in acid catalysis, 85
substrate specificity and stereoselectivity of epoxidation of, with *Methylosinus trichosporium* (OB3b), L65
Alkynes
regiospecific alkyne–formate ester reactions catalyzed by Pd(0), L27
Aluminium
metathesis of methyl-1-alkenes over $CsNO_3$—Re_2O_7—Al_2O_3 catalyst, 261
particle size effect on enantioselective hydrogenation of ethyl pyruvate over alumina-supported Pt catalyst, 195
Amination
catalytic, of monoolefins; functionalization of alkenes, 235
Amphiphiles
cholesterol-containing; enantioselective solvolyses of L- and D-phenylalanine *p*-nitrophenyl esters by L-histidyl dipeptide in surfactant coaggregates formed by, L7
Aromatic compounds
asymmetric catalysis; enantioselective Michael additions catalyzed by Co(II)/1,2-diphenylethylenediamine, 133
effects of neutral ligands in reductive carbonylation of nitrobenzene catalyzed by $Ru_3(CO)_{12}$ and $Rh_6(CO)_{16}$, 59
enantioselective solvolyses of L- and D-phenylalanine *p*-nitrophenyl esters by L-histidyl dipeptide in surfactant coaggregates formed by cholesterol-containing amphiphiles, L7
hydrogenation of cinnamaldehyde over Pt catalysts; influence of addition of metal chlorides, 223
improved Rh–DIOP catalyst system for homogeneous asymmetric hydrogenation of acetophenone, 165
kinetics and mechanism of $RuCl_2(PPh_3)_3$-catalyzed oxidation of sulphides by *N*-methylmorpholine *N*-oxide, 153
oxidation of benzyl alcohol with Cu(II) mediated by polymeric oxoaminium salt, L31
particle size effect on enantioselective hydrogenation of ethyl pyruvate over alumina-supported Pt catalyst, 195
selective hydrogen transfer reactions from alcohols to ketones promoted by Rh complexes with 1,10-phenanthroline and related ligands, 175
selective reductions of aromatic carbonyls and nitrobenzene by new interlamellar montmorillonitesilylamine–Pd(II) catalyst, L47
shape selective alkane functionalization by ethyl diazoacetate catalyzed by Rh carboxylates, L13
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Rh(I) complexes of bidentate (NP) ligand, (2-(diphenylphosphino)ethyl)benzylamine, 33
Ascorbate
hydrogenation of membrane lipids by catalyzed hydrogen transfer from, L1
Ascorbic acid
kinetics of epoxidation of cyclohexene by molecular oxygen catalyzed by dichlorotetraaquoruthenium(III) in presence of reductants L-ascorbic acid and methanol, 299

Caesium
metathesis of methyl-1-alkenes over $CsNO_3$—Re_2O_7—Al_2O_3 catalyst, 261
Carbon monoxide
catalyzed by La-promoted Pd zeolites; intermediates in hydrogenation of, L53
and ethylene; enhancement of ethylene metathesis rate by adsorbate interaction between, L43
and H_2; ethylene glycol formation from, by homogeneous Re catalysts, 315
low temperature homologation of ethanol catalyzed by Ru–EDTA–CO complex, L69
Carbonylation
Pd-catalyzed oxidative, of hydroxyenones; synthesis of spiroacetals by, L61
reductive; effects of neutral ligands in, of nitrobenzene catalyzed by $Ru_3(CO)_{12}$ and $Rh_6(CO)_{16}$, 59
Carbonyls
aromatic, and nitrobenzene; selective reductions of, by new interlamellar montmorillonitesilylamine–Pd(II) catalyst, L47

Carboxylates
Rh; shape selective alkane functionalization by ethyl diazoacetate catalyzed by, L13
Catalytic activity
and synthesis of polymer-supported Rh(I) complex, 285
Chemisorption
Ni–Cu catalysts with parallel chemisorption of O_2 and decomposition of N_2O, 71
Chlorine
hydrogenation of cinnamaldehyde over Pt catalysts; influence of addition of metal chlorides, 223
kinetics of epoxidation of cyclohexene by molecular oxygen catalyzed by dichlorotetraaquoruthenium(III) in presence of reductants L-ascorbic acid and methanol, 299
kinetics and mechanism of $RuCl_2(PPh_3)_3$-catalyzed oxidation of sulphides by *N*-methylmorpholine *N*-oxide, 153
Cholesterol-containing amphiphiles
enantioselective solvolyses of L- and D-phenylalanine *p*-nitrophenyl esters by L-histidyl dipeptide in surfactant coaggregates formed by, L7
Cinnamaldehyde
hydrogenation of, over Pt catalysts; influence of addition of metal chlorides, 223
Cluster
electron transfer reactions catalyzed by Fe–S cluster, $(n\text{-}Bu_4N)_2[Fe_4S_4(SCH_2CONH_2)_4]$, in 90% DMF–10% H_2O, 1
C—N bonds
transformation of compounds containing, on heterogeneous catalysis: hydrogenolysis of β-lactams on Raney Ni; new method for preparation of 1,3-aminoalcohols, 103
Cobalt
asymmetric catalysis; enantioselective Michael additions catalyzed by Co(II)/1,2-diphenylethylenediamine, 133
Co/Zr-catalyzed oxidation of cyclohexane to adipic acid, L39
Copper
liquid phase synthesis of alcohols from syngas over electrogenerated Cu–metal catalyst, L35
Ni–Cu catalysts with parallel chemisorption of O_2 and decomposition of N_2O, 71
oxidation of benzyl alcohol with Cu(II) mediated by polymeric oxoaminium salt, L31
Cyanides
epoxide-opening with trimethylsilyl cyanide catalyzed by tetraisopropyl orthotitanate, L23
intermediate species in polymerization of isocyanides, 21
Cyclopentadiene
formation of cyclopentadienyl anions at surface of MgO by interaction with, and their reaction with H_2 to give surface hydrides, 187

Decomposition
Ni–Cu catalysts with parallel chemisorption of O_2 and decomposition of N_2O, 71
Dehydrogenation
photocatalytic liquid-phase, of cyclohexanol with Rh porphyrin complex, 113
Dienones
conjugated; catalytic formation of, from ynones by Ru complex, L19
DIOP
improved Rh–DIOP catalyst system for homogeneous asymmetric hydrogenation of acetophenone, 165
DMF
electron transfer reactions catalyzed by Fe–S cluster, $(n\text{-}Bu_4N)_2[Fe_4S_4(SCH_2CONH_2)_4]$, in 90% DMF–10% H_2O, 1

Electron transfer reactions
catalyzed by Fe–S cluster, $(n\text{-}Bu_4N)_2[Fe_4S_4(SCH_2CONH_2)_4]$, in 90% DMF–10% H_2O, 1
Epoxidation
of alkenes with *Methylosinus trichosporium* (OB3b); substrate specificity and stereoselectivity of, L65
of cyclohexene by molecular oxygen catalyzed by dichlorotetraaquoruthenium(III) in presence of reductants L-ascorbic acid and methanol; kinetics of, 299
Epoxide-opening
with trimethylsilyl cyanide catalyzed by tetraisopropyl orthotitanate, L23

Esters
enantioselective solvolyses of L- and D-phenylalanine *p*-nitrophenyl esters by L-histidyl dipeptide in surfactant coaggregates formed by cholesterol-containing amphiphiles, L7
regiospecific alkyne–formate ester reactions catalyzed by Pd(0), L27
Ether
synthesis of ter-amylic methyl ether (TAME) in acid catalysis; kinetics and equilibria of methoxylation of 2-methyl-2-butene, 85
Ethyl pyruvate
particle size effect on enantioselective hydrogenation of, over alumina-supported Pt catalyst, 195

Homologation
low temperature, of ethanol catalyzed by Ru–EDTA–CO complex, L69
Hydrogen
and CO; ethylene glycol formation from, by homogeneous Re catalysts, 315
formation of cyclopentadienyl anions at surface of MgO by interaction with cyclopentadiene and their reaction with, to give surface hydrides, 187
hydrogenation of membrane lipids by catalyzed hydrogen transfer from ascorbate, L1
selective hydrogen transfer reactions from alcohols to ketones promoted by Rh complexes with 1,10-phenanthroline and related ligands, 175
Hydrogenation
catalysts; hydride complexes of Ti and Zr attached to SiO_2 as, 121
of cinnamaldehyde over Pt catalysts; influence of addition of metal chlorides, 223
enantioselective; particle size effect on, of ethyl pyruvate over alumina-supported Pt catalyst, 195
homogeneous asymmetric; improved Rh–DIOP catalyst system for, of acetophenone, 165
homogeneous, of cyclohexene catalyzed by:
Rh(I) complexes of bidentate (NP) ligand, (2-(diphenylphosphino)-ethyl)benzylamine; thermodynamics of, 33
Rh(I) and Ir(I) complexes of polydentate phosphine ligands; thermodynamics of, 43
intermediates in, of CO catalyzed by La-promoted Pd zeolites, L53
of membrane lipids by catalyzed hydrogen transfer from ascorbate, L1
Hydrogenolysis
of β-lactams on Raney Ni; new method for preparation of 1,3-aminoalcohols; transformation of compounds containing C—N bonds on heterogeneous catalysis, 103
Hydroxyenones
synthesis of spiroacetals by Pd-catalyzed oxidative carbonylation of, L61

Iridium
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Rh(I) and Ir(I) complexes of polydentate phosphine ligands, 43
Iron
electron transfer reactions catalyzed by Fe–S cluster, $(n\text{-}Bu_4N)_2[Fe_4S_4(SCH_2CONH_2)_4]$, in 90% DMF–10% H_2O, 1

Ketone(s)
methyl ethyl; liquid phase catalytic oxidation of butene to; kinetic study, 143
selective hydrogen transfer reactions from alcohols to, promoted by Rh complexes with 1,10-phenanthroline and related ligands, 175

Lactams
transformation of compounds containing C—N bonds on heterogeneous catalysis: hydrogenolysis of β-lactams on Raney Ni, new method for preparation of 1,3-aminoalcohols, 103
Lanthanum
intermediates in hydrogenation of CO catalyzed by La-promoted Pd zeolites, L53
Lipids
membrane; hydrogenation of, by catalyzed hydrogen transfer from ascorbate, L1

Magnesium
formation of cyclopentadienyl anions at surface of MgO by interaction with cyclopentadiene and their reaction with H_2 to give surface hydride, 187
Membrane lipids
hydrogenation of, by catalyzed hydrogen transfer from ascorbate, L1
Metal chlorides
hydrogenation of cinnamaldehyde over Pt catalysts; influence of addition of, 223
kinetics and mechanism of $RuCl_2(PPh_3)_3$-catalyzed oxidation of sulphides by *N*-methylmorpholine *N*-oxide, 153
Metathesis
ethylene, rate by adsorbate interaction between ethylene and CO; enhancement of, L43
of methyl-1-alkenes over $CsNO_3$—Re_2O_7—Al_2O_3 catalyst, 261
Methoxylation
synthesis of ter-amylic methyl ether (TAME) in acid catalysis; kinetics and equilibria of, of 2-methyl-2-butene, 85
Methylosinus trichosporium (OB3b)
substrate specificity and stereoselectivity of epoxidation of alkenes with, L65
Montmorillonite
selective reductions of aromatic carbonyls and nitrobenzene by new interlamellar montmorillonitesilylamine–Pd(II) catalyst, L47

Nickel
Ni–Cu catalyst with parallel chemisorption of O_2 and decomposition of N_2O, 71
transformation of compounds containing C—N bonds on heterogeneous catalysis: hydrogenolysis of β-lactams on Raney Ni; new method for preparation of 1,3-aminoalcohols, 103
Nitriles
and nitroalkenes; orthometalated Pd(II) complex-catalyzed reduction of, 271
Nitrobenzene
and aromatic carbonyls; selective reductions of, by new interlamellar montmorillonitesilylamine–Pd(II) catalyst, L47
catalyzed by $Ru_3(CO)_{12}$ and $Rh_6(CO)_{16}$; effects of neutral ligands in reductive carbonylation of, 59
Nitrous oxide
Ni–Cu catalysts with parallel chemisorption of O_2 and decomposition of, 71

Olefins: see Alkenes
Oxidation
of benzyl alcohol with Cu(II) mediated by polymeric oxoaminium salt, L31
Co/Zr-catalyzed, of cyclohexane to adipic acid, L39
liquid phase catalytic, of butene to methyl ethyl ketone; kinetic study, 143
$RuCl_2(PPh_3)_3$-catalyzed oxidation of sulphides by *N*-methylmorpholine *N*-oxide; kinetics and mechanism of, 153
Oxygen
kinetics of epoxidation of cyclohexene by molecular oxygen catalyzed by dichlorotetraaquoruthenium(III) in presence of reductants L-ascorbic acid and methanol, 299
Ni–Cu catalysts with parallel chemisorption of O_2 and decomposition of N_2O, 71
stereochemical control of oxygen activation in synthetic oxygen carriers, 9

Palladium
intermediated in hydrogenation of CO catalyzed by La-promoted Pd zeolites, L53
orthometalated Pd(II) complex-catalyzed reduction of nitroalkanes and nitriles, 271
regiospecific alkyne–formate ester reactions catalyzed by Pd(0), L27
selective reductions of aromatic carbonyls and nitrobenzene by new interlamellar montmorillonitesilylamine–Pd(II) catalyst, L47
synthesis of spiroacetals by Pd-catalyzed oxidative carbonylation of hydroxyenones, L61
Particle size effect
on enantioselective hydrogenation of ethyl pyruvate over alumina-supported Pt catalyst, 195

Peptides
enantioselective solvolyses of L- and D-phenylalanine *p*-nitrophenyl esters by L-histidyl dipeptide in surfactant coaggregates formed by cholesterol-containing amphiphiles, L7
Phosphorus
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by:
Rh(I) complexes of bidentate (NP) ligand, (2-(diphenylphosphino)-ethyl)benzylamine, 33
Rh(I) and Ir(I) complexes of polydentate phosphine ligands, 43
Photocatalysis
photocatalytic liquid-phase dehydrogenation of cyclohexanol with Rh porphyrin complex, 113
Platinum
hydrogenation of cinnamaldehyde over Pt catalysts: influence of addition of metal chlorides, 223
particle size effect on enantioselective hydrogenation of ethyl pyruvate over alumina-supported Pt catalyst, 195
Polymerization
intermediate species in, of isocyanides, 21
Polymers
oxidation of benzyl alcohol with Cu(II) mediated by polymeric oxoaminium salt, L31
synthesis and catalytic activity of polymer-supported Rh(I) complex, 285
Porphyrins
photocatalytic liquid-phase dehydrogenation of cyclohexanol with Rh porphyrin complex, 113

Redox reactions
kinetic modelling studies of transition metal-exchanged zeolites as catalysts for, 205
Reduction(s)
orthometalated Pd(II) complex catalyzed, of nitroalkanes and nitriles, 271
selective, of aromatic carbonyls and nitrobenzene by new interlamellar montmorillonitesilylamine–Pd(II) catalyst, L47
Rhenium
ethylene glycol formation from CO and H_2 by homogeneous Re catalysts, 315
metathesis of methyl-1-alkenes over $CsNO_3$–Re_2O_7–Al_2O_3 catalysts, 261
Rhodium
effects of neutral ligands in reductive carbonylation of nitrobenzene catalyzed by $Ru_3(CO)_{12}$ and $Rh_6(CO)_{16}$, 59
improved Rh–DIOP catalyst system for homogeneous asymmetric hydrogenation of acetophenone, 165
photocatalytic liquid-phase dehydrogenation of cyclohexanol with Rh porphyrin complex, 113
selective hydrogen transfer reactions from alcohols to ketones promoted by Rh complexes with 1,10-phenanthroline and related ligands, 175
shape selective alkane functionalization by ethyl diazoacetate catalyzed by Rh carboxylates, L13
synthesis and catalytic activity of polymer-supported Rh(I) complex, 285
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by:
Rh(I) complexes of bidentate (NP) ligand, (2-(diphenylphosphino)-ethyl)benzylamine, 33
Rh(I) and Ir(I) complexes of polydentate phosphine ligands, 43
Ruthenium
catalytic formation of conjugated dienones from ynones by Ru complex, L19
effects of neutral ligands in reductive carbonylation of nitrobenzene catalyzed by $Ru_3(CO)_{12}$ and $Rh_6(CO)_{16}$, 59
kinetics of epoxidation of cyclohexene by molecular oxygen catalyzed by dichlorotetraaquoruthenium-(III) in presence of reductants L-ascorbic acid and methanol, 299
kinetics and mechanism of $RuCl_2(PPh_3)_3$-catalyzed oxidation of sulphides by *N*-methylmorpholine *N*-oxide, 153

low temperature homologation of ethanol catalyzed by Ru–EDTA–CO complex, L69
Silicon
epoxide-opening with trimethylsilyl cyanide catalyzed by tetraisopropyl orthotitanate, L23
hydride complexes of Ti and Zr attached to SiO_2 as hydrogenation catalysts, 121
selective reductions of aromatic carbonyls and nitrobenzene by new interlamellar montmorillonitesilylamine–Pt(II) catalyst, L47
Solvolyses
enantioselective, of L- and D-phenylalanine *p*-nitrophenyl esters by L-histidyl dipeptide in surfactant coaggregates formed by cholesterol-containing amphiphiles, L7
Spiroacetals
synthesis of, by Pd-catalyzed oxidative carbonylation of hydroxyenones, L61
Sulphur
electron transfer reactions catalyzed by Fe–S cluster, $(n\text{-}Bu_4N)_2[Fe_4S_4(SCH_2CONH_2)_4]$, in 90% DMF–10% H_2O, 1
kinetics and mechanism of $RuCl_2(PPh_3)_3$-catalyzed oxidation of sulphides by *N*-methylmorpholine *N*-oxide, 153
Surface hydrides
formation of cyclopentadienyl anions at surface of MgO by interaction with cyclopentadiene and their reaction with H_2 to give, 187
Surfactant coaggregates
enantioselective solvolyses of L- and D-phenylalanine *p*-nitrophenyl esters by L-histidyl dipeptide in, formed by cholesterol-containing amphiphiles, L7
Syngas
liquid phase synthesis of alcohols from, over electrogenerated Cu–metal catalyst, L35
Synthesis
and catalytic activity of polymer-supported Rh(I) complex, 285
liquid phase, of alcohols from syngas over electrogenerated Cu–metal catalysts, L35
of spiroacetals by Pd-catalyzed oxidative carbonylation of hydroxyenones, L61
of ter-amylic methyl ether (TAME) in acid catalysis; kinetics and equilibria of methoxylation of 2-methyl-2-butene, 85

Thermodynamics
of homogeneous hydrogenation of cyclohexene catalyzed by:
Rh(I) complexes of bidentate (NP) ligand, (2-(diphenylphosphino)-ethyl)benzylamine, 33
Rh(I) and Ir(I) complexes of polydentate phosphine ligands, 43
Titanium
epoxide-opening with trimethylsilyl cyanide catalyzed by tetraisopropyl orthotitanate, L23
hydride complexes of Ti and Zr attached to SiO_2 as hydrogenation catalysts, 121

Water
electron transfer reactions catalyzed by Fe–S cluster, $(n\text{-}Bu_4N)_2[Fe_4S_4(SCH_2CONH_2)_4]$, in 90% DMF–10% H_2O, 1

Ynones
catalytic formation of conjugated dienones from, by Ru complex, L19

Zeolites
La-promoted Pd; intermediates in hydrogenation of CO catalyzed by, L53
transition metal-exchanged, as catalysts for redox reactions; kinetic modelling studies, 205
Zirconium
Co/Zr-catalyzed oxidation of cyclohexane to adipic acid, L39
hydride complexes of Ti and Zr attached to SiO_2 as hydrogenation catalysts, 121
